

MindEase-AI

Bridging the Gap Between AI and Human Empathy.

TEAM NODE KNIGHTS:-

HARIOM KUMAR
SHRIYAM SANDILYA
DEVA KUMAR

The "Monotony" of Mental Health Tools.

- *Static bots lack real-time empathy.*
Students face 70% higher burnout during exam seasons.
- *Generic advice fails to provide immediate "Actionable Relief."*

MindEase: A Proactive Emotional Ecosystem.

Sentiment Analysis: Transforming text into a Polarity Score $[-1.0, 1.0]$.

- *Multi-Modal Interventions: Music therapy, Art prompts, and Wisdom quotes.*
- *Real-Time Visuals: Dynamic Mood Pulse tracking.*

Innovation & Creativity

Feature 1: Exam Stress Mode (Automatic detection of academic pressure).

- Feature 2: Art Prompt Generator (Using AI to suggest creative outlets for low moods).

- Feature 3: Mood-to-Music DJ (Automatic YouTube playlist matching)

MindEase AI: The Vibrant Companion

Hackathon Edition: Advanced Emotional Intelligence Dashboard

How are you feeling?

I am stressed . I have my exams next week so i am scared of that because i have not studied anything .

✨ SYNC MY VIBE ✨

Plot

Real-Time Emotional Pulse

EXAM STRESS MODE

MOOD: -0.70

AI Reflection: The pressure is real, but you are capable of handling it!

MISSION:

Drink a full glass of water and stretch for 2 minutes. 💧

ART PROMPT:

'A lonely lighthouse in a violet storm, oil painting, expressive brushstrokes'

WISDOM:

"Focus on the next small step, not the whole mountain. ✨"

💖 ****Wellness Tip:**** Reach out to a trusted friend or family member. Sharing can lighten the load.

💡 ****Mindfulness Exercise:**** Focus on your senses for one minute. What 5 things can you see, 4 things you can feel, 3 things you can hear, 2 things you can smell, and 1 thing you can taste?

 Play Song-> [EXAM MODE: BEAT THE STRESS BI-FI]

Technical Complexity (The Architecture)

NLP Engine: TextBlob for Sentiment Polarity & Subjectivity.

- **Frameworks: Streamlit for the Web UI.**
- **Visuals: Matplotlib/Plotly for the "Real-Time Emotional Pulse."**
- **Dual Deployment: Google Colab (Cloud-based testing) & VS Code (Production-ready local environment).**

Dual Deployment Strategy.

- *VS Code (Local Server): High-performance deployment using custom CSS for the vibrant UI seen in the screenshots.*
- *Colab: Allows for instant cloud accessibility and judge-ready simulations.*

MindEase AI

Your journey to inner peace begins here.

Mood Tracker (1-10)

I feel your tension. Let's breathe together.

Mood: Anxious | Level: 4

I feel your tension. Let's breathe together.

Mood: Anxious | Level: 4

That's amazing! Keep that energy up!

Mood: Happy | Level: 9

I'm sorry. It's okay to feel this way. I'm here.

Mood: Sad | Level: 3

Type your feelings here...

Send

i am angry.

i am very happy.

i am sad.

 Emergency Support

1800-11-2345 (Vandrevala Foundation)

You are not alone. Please reach out if you're in distress.

Real-World Impact

Target Audience: Students, Remote Workers, and Individuals in high-pressure environments.

Impact: Immediate de-escalation of stress via grounding exercises and 24/7 helpline accessibility for high-risk scores.

Feasibility & Scalability.

Feasibility: Lightweight Python backend makes it deployable on low-end hardware.

- *Scalability: * Transitioning to AWS/Azure for global reach.*
 - *Adding Speech-to-Text for voice-based therapy.*
 - *Multilingual Support: Hindi & Bengali sentiment engines.*

HIGHER ACHIEVEMENTS

THE PEAK IS ONLY THE BEGINNING

Future Scope & Conclusion

*Next Steps: Integration with wearables
(Heart rate → Mood correlation).*

- *Closing: "MindEase isn't just a bot;
it's a digital friend that
understands the weight of your
words."*
